Instructions:

For each freight car on your layout fill out one car card above. You will only have to do this once for each car you have.

Printing:

Print this sheet on heavy card stock for better durability. Ivory is the desired color of paper but you can use any color you want. You can take this document to your local copy shop to have them print out the copies on the paper you select. After printing use a paper cutter or scissors to cut out each car card. Fold the bottom 1.5" of the card up to form a pocket on the front of the card. This pocket will hold a waybill. Secure the sides of the pocket with tape. The finished car card will be 2" wide by 4" tall with a pocket on the front.

These cards may be copied for your personal enjoyment of the hobby.
Commercial use prohibited.- Mark N. Goedert
